

TILFORD & RUSHMOOR RIDING CLUB

BRC Rules for Area Team Competitions

FLU CERTIFICATES (Equine Influenza)

The British Riding Clubs (BRC) equine influenza rules are based on the British Horseracing Authority Rule (formerly The Jockey Club).

Each pony or horse must have a valid vaccination certificate which undeniably relates to that pony or horse, completed, signed and stamped by a veterinary surgeon who is not the owner of the pony or horse. It must state that the pony or horse has received the appropriate course of injections: (see below)

Please note: that for the BRC National Championship qualifiers held in each Area (TRRC team competitions), your horse must have a valid flu certificate which means that the dates of vaccinations must comply with the following:

- Horse must have had its first two vaccinations at least.
- The second vaccination must have been given between 21 and 92 days after the first one
- There must be a third vaccination given between 150 and 215 days after the second one
- Thereafter, the horse must have had booster vaccinations at intervals not exceeding one year (12 months)
- The horse or pony **must not** have been vaccinated **within the 7 days preceding** the competition (including the day of competition)
